

SgtAuroraMainTex

This component allows you to generate the SgtAurora.MainTex field.

Width

The width of the generated texture. A higher value can result in a smoother transition. This stores the noise samples.

Height

The height of the generated texture. A higher value can result in a smoother transition. This stores the vertical color samples.

Format

The format of the generated texture.

NoiseStrength

The strength of the noise points.

NoisePoints

The amount of noise points.

NoiseSeed

The random seed used when generating this texture.

TopEase

The transition style between the top and middle.

TopSharpness

The transition strength between the top and middle.

MiddlePoint

The point separating the top from bottom.

MiddleColor

The base color of the aurora starting from the bottom.

MiddleEase

The transition style between the bottom and top of the aurora.

MiddleSharpness

The strength of the color transition between the bottom and top.

BottomEase

The transition style between the bottom and middle.

BottomSharpness

The transition strength between the bottom and middle.
