

SgtAtmosphereDepthTex

This component allows you to generate the SgtAtmosphere.InnerDepthTex and SgtAtmosphere.OuterDepthTex fields.

Width

The width of the generated texture. A higher value can result in a smoother transition.

Format

The format of the generated texture.

HorizonColor

This allows you to set the color that appears on the horizon.

InnerColor

The base color of the inner texture.

InnerEase

The transition style between the surface and horizon.

InnerColorSharpness

The strength of the inner texture transition.

InnerAlphaSharpness

The strength of the inner texture transition.

OuterColor

The base color of the outer texture.

OuterEase

The transition style between the sky and horizon.

OuterColorSharpness

The strength of the outer texture transition.

OuterAlphaSharpness

The strength of the outer texture transition.
